

Sapphire
YAG

THE SAPPHIRE Nd:YAG 1064

The ideal solution for the busy clinic, which can be safely and successfully used for the removal of hair on skin types I-VI

Laser light at 1064nm penetrates deeper into the skin enabling the targeting of a broader range of skin and hair types, making long pulsed Nd: Yag lasers the best choice for hair removal on skin types I-VI.

Unwanted hair can be a thing of the past using the Sapphire long pulsed Nd: Yag Laser.

Permanent hair reduction can be successfully achieved for both men and women.

All areas of the body can be safely treated, using the ergonomic and easy to use hand piece.

Made in the U.K.

SPECIFICATION

Wavelength	1064nm
Mode	Long pulsed
Energy	up to 45J per pulse
Pulse duration	10ms
Repetition rate	up to 1.7Hz
Beam delivery	Fibre optic
Spot size	4 & 10mm
Aiming Beam	635nm Diode
Fluence	upto 300 J/cm sq
Size	H 88, W 35, D 78cm
Weight	65Kg
Electrical	240V 113A / 50HZ
System Cooling	Internal self contained
